

sterilcoat AM™
ANTIMICROBIAL Powder Coatings

Looking for germs??

...they're all gone.

Sterilcoat AM Antimicrobial Powder Coatings

Powder Coatings for Life

Antibacterial Powder Coatings

Sterilcoat AM is Protech's line of anti-microbial powder coatings that prevent the spread of dangerous micro-organisms and suppress the growth of mold and bacteria. Independent laboratory results show a significant decrease in microbial population on surfaces coated with Sterilcoat AM. These powders are formulated to provide this protection over an extended period of time and frequent washings of a Sterilcoat AM finished surface will not reduce the powder's anti-bacterial properties. Sterilcoat AM powders are extremely durable and demonstrate outstanding chemical and stain resistance. They are available in a wide range of colors and textures and can be formulated in any chemistry. Sterilcoat AM is the ideal application for hand rails, fitness equipment, bathroom partitions, hospital equipment and any other surface that may breed harmful bacteria.

ADVANTAGES

- Sterilcoat AM powders on finished surfaces significantly reduce microbial activity
- Protects against the spread of micro-organisms
- Inhibits the growth of dangerous bacteria and mold
- Provides protection over an extended period of time
- Retains anti-microbial properties even after repeated washings
- Can be formulated for exterior durability
- Superior chemical, stain, and scratch resistance
- Outstanding durability
- Available in a wide range of colors and textures
- Environmentally friendly
